LIGHT UP YOUR VIDEO DISPLAY

WITH DISPLAY DIRECTOR

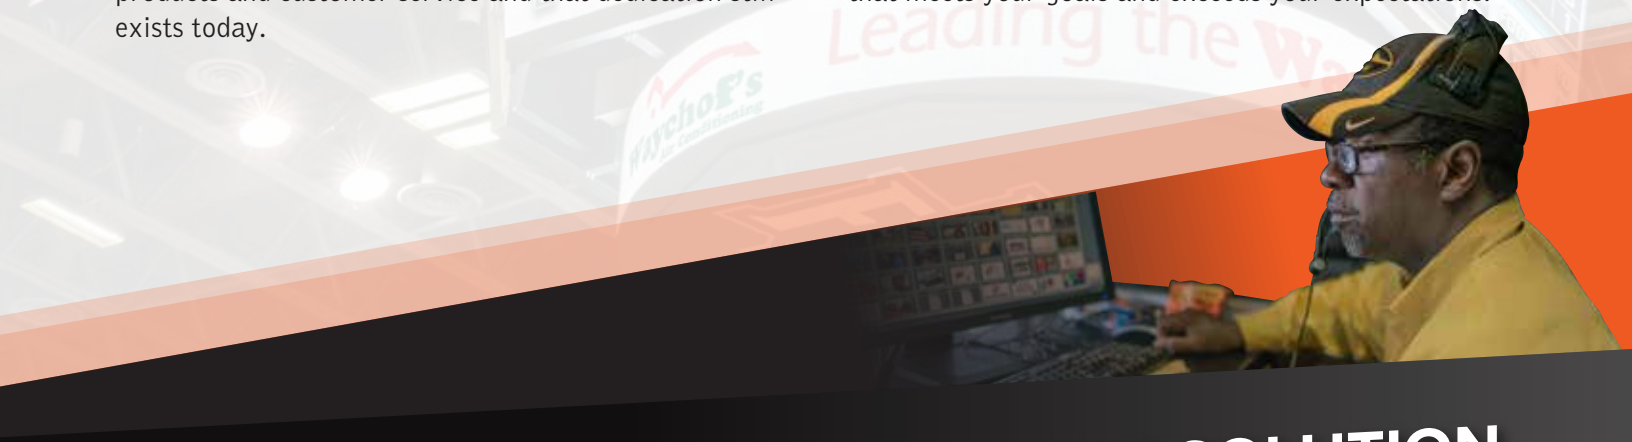
NEVCO

THE NEVCO DIFFERENCE

SUPERIOR TECHNOLOGY, QUALITY, AND SUPPORT

For over 80 years, Nevco has achieved the industry's highest customer satisfaction levels among all other scoreboard manufacturers by offering the most reliable products on the market with second-to-none customer service. Only Nevco delivers superior quality products with the industry's fastest turnaround and delivery times, backed by an unmatched 5-year parts and labor warranty. We built our reputation on long-lasting products and customer service and that dedication still exists today.

Partnering with Nevco allows you to design a video, audio, and scoring solution that uniquely represents your team or program. The entire Nevco product line, from basic scoreboards to video displays utilize the latest in LED technology, and are made in America using only the highest quality electronics and manufacturing processes. Our team's mission is to provide you with a solution aligned with your budget, that meets your goals and exceeds your expectations.



NEVCO IS YOUR **SINGLE SOURCE SOLUTION**

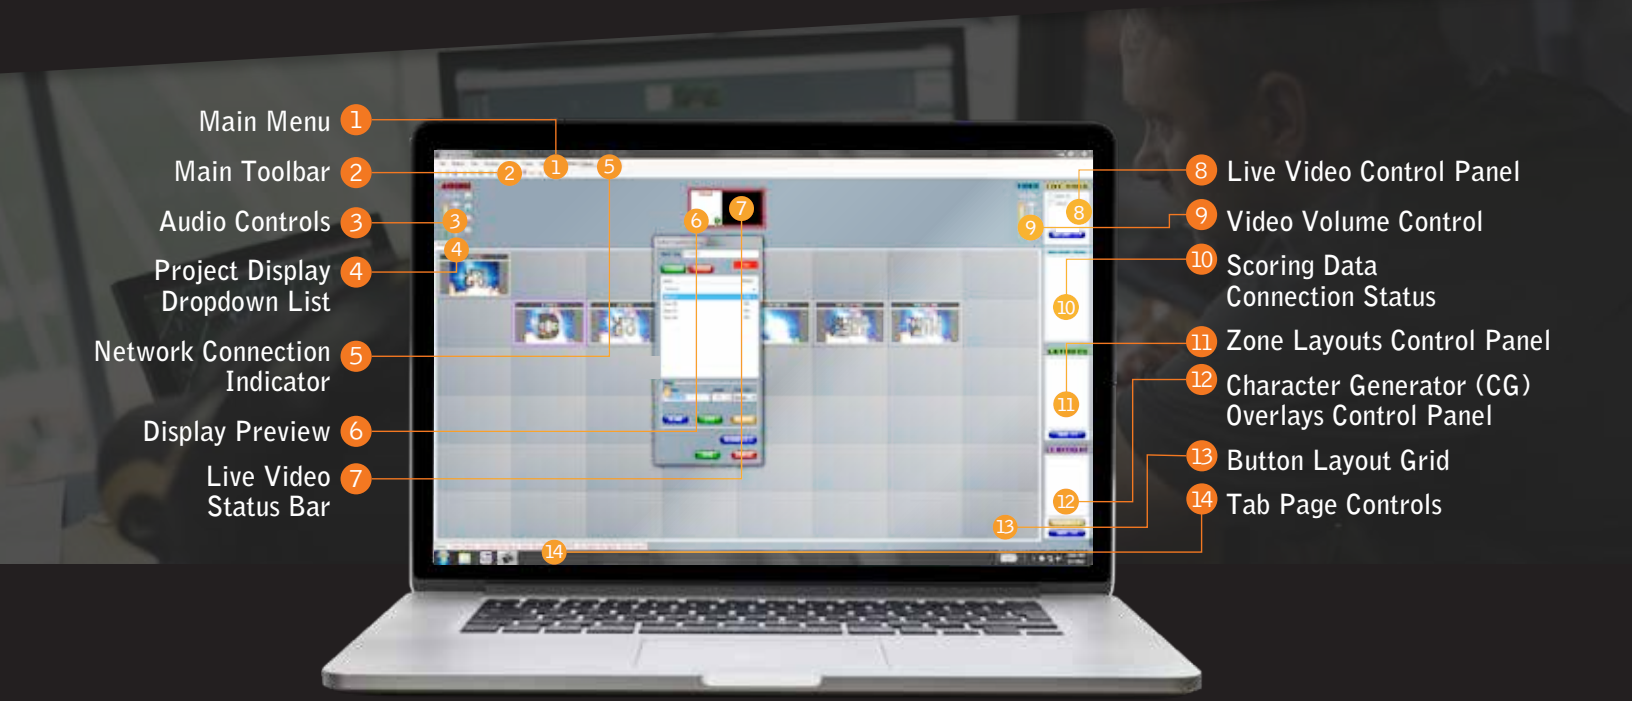
VIDEO DISPLAY CONTROL SOFTWARE CAPABLE OF:

- Intuitive User Interface
- Virtual Scoring
- Stat Software Interface
- Graphics Package
- Remote Access Diagnostics

DISPLAY DIRECTOR GIVES YOU **HOME FIELD ADVANTAGE**



CUSTOMIZE YOUR GAME-DAY EXPERIENCE

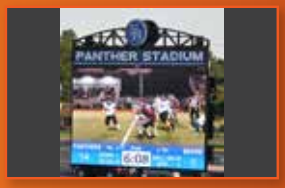
Display Director controls:

Visual and audio

Virtual scoring

Stats integration

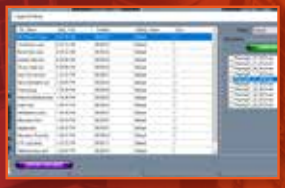
Live camera feed



Instant replays

Fan prompts

Sponsorship



Proof of play reporting

Overlay functionality

Content creation functionality

Create media sequences

Zone your video board into multiple displays

ORGANIZE CONTENT

Organizational techniques allow you to efficiently use Display Director during games.

PROJECTS - Used to host all organized content.

For Example: Basketball Game Project (project hosts tab "1st quarter" which hosts button "foul play")

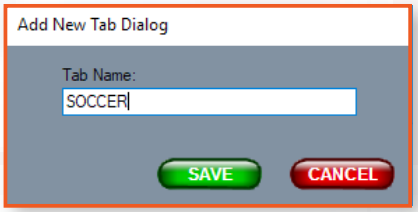
TABS - Used to organize content in a project.

For Example: 1st Quarter Tab (hosted in project "basketball game", hosts button "foul play")

BUTTONS - Used to host and push specific content.

For Example: Foul Play Button (hosted in tab "1st quarter" which is hosted in project "basketball game")

Keep pace of the game by creating keyboard shortcuts. For example "Ctrl + 3" for a 3 pointer



Change title of tabs to easily distinguish between Varsity and JV, or football vs. soccer, or Pre-Game vs. Half-Time

Modify button colors to categorize ads, different sports, player headshots, etc

IMPORTING CONTENT & PUSHING LIVE

Display Director will resize the imported content to fit the display.

IMPORTING MEDIA

Easily import media from desktop or jumpdrive

Images are saved locally for faster response times

Accepts all major file types

EDIT/LIVE MODE

Accident-proof your game as images can only be sent to the display when in Live Mode

Edit Mode is utilized when building the project

LIVE CAMERA FEED

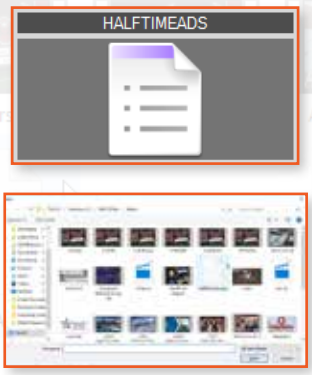
Going to live camera feed is as easy as touching "Go Live" on the screen or setting up a hot key shortcut

Easily reverse and take the display back

MEDIA SEQUENCE

Creating a media sequence is as easy as 1, 2, 3. Media Sequences are great to "set it and forget it" if you need to walk away from the display, such as during half-time.

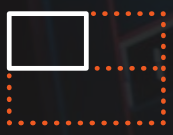
1	IMPORT MULTIPLE MEDIA FILES	2	SET DURATION AND TRANSITIONS	3	ADD MEDIA SEQUENCE TO BUTTON



ZONES

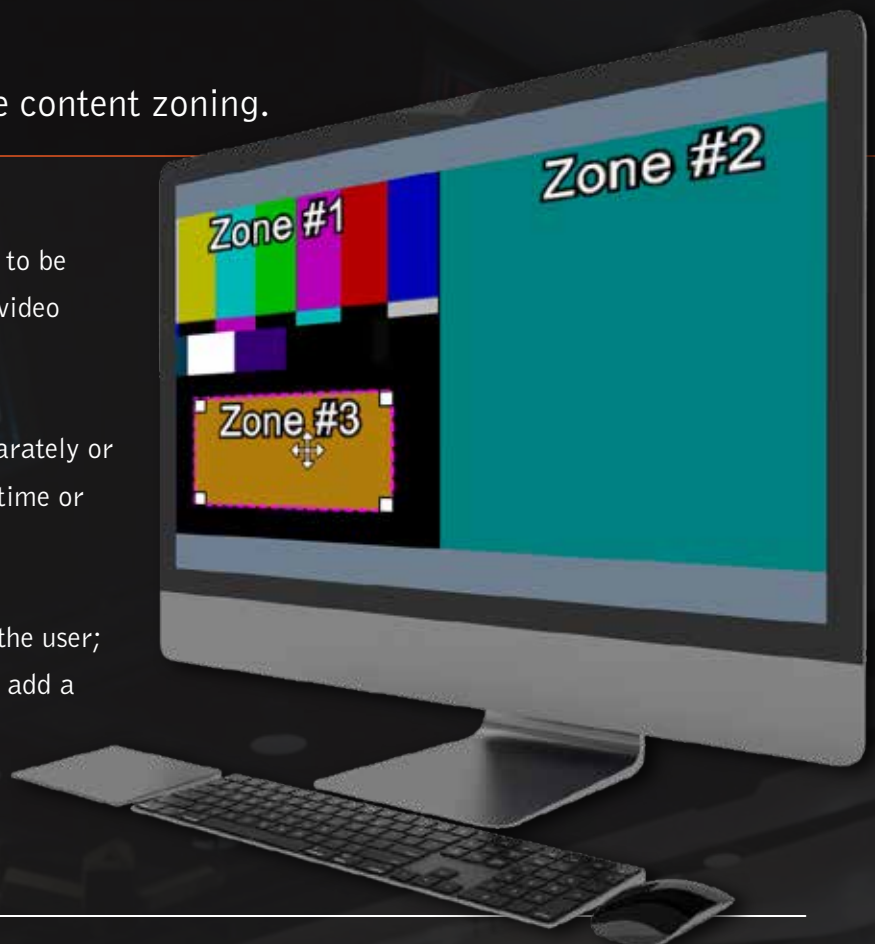
Maximize your display with variable content zoning.

Allows users to separate content to be displayed simultaneously on the video board



Each zone can be controlled separately or cohesively (can change one at a time or all together)

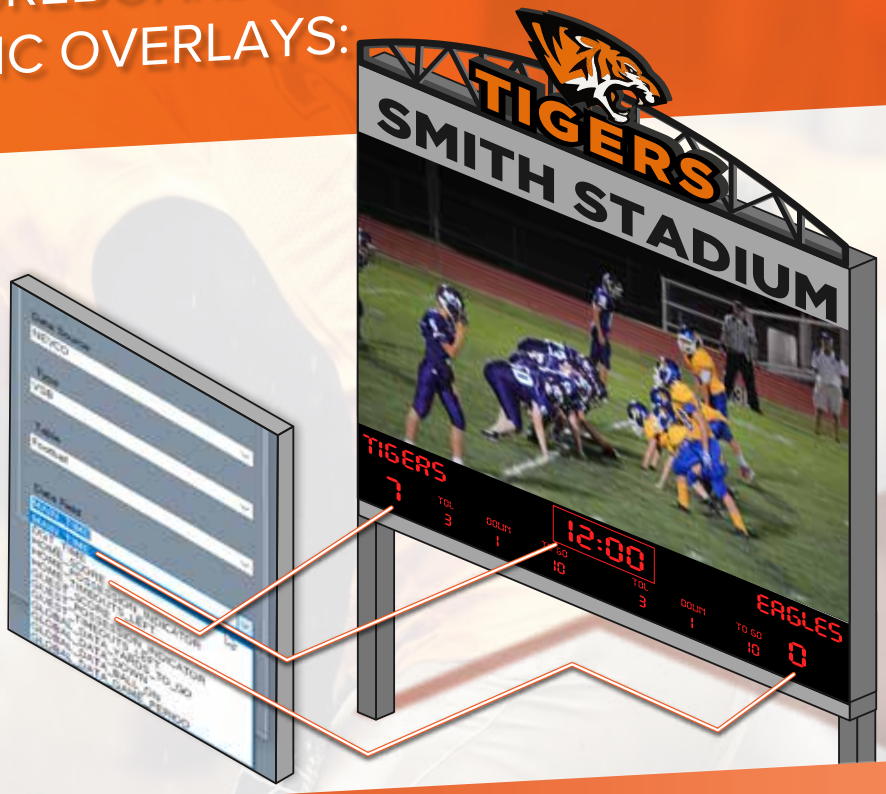
Zones are fully customizable by the user; can be resized and moved or can add a border around each zone



VIRTUAL SCORING

CREATING A VIRTUAL SCOREBOARD IS EASY WITH SPORT SPECIFIC OVERLAYS:

- Fully customizable, choose only the fields you want to display
- Select font, size, and color and add images (such as a school logo)
- Add dynamic fields (home and guest team names that change every game)
- Virtual Scoring will overlay on top of anything else (live video, ads, etc.)



INTEGRATION WITH **THIRD PARTY STATS**

CBS STATCREW

LYNX

FLASHTIMING

STALKER®

HyTek AUTOMATION SOLUTIONS

CG OVERLAY SEQUENCE

CHARACTER GENERATION OVERLAYS MAKE IT EASY TO REACH YOUR FANS

- Reach your fans by overlaying a message on the display
- Overlay static text, dynamic text, and images
- Create announcements/messages - add current date and time overlays, fan cams, and more!

EXPERIENCE THE **NEVCO DIFFERENCE**

FROM CONCEPT TO GAME-DAY

COMPLETE END-TO-END PROJECT MANAGEMENT INSTALLATION

ON-SITE TRAINING WITH NEVCO TECHNICIAN

HYPE GRAPHICS COME STANDARD ON EVERY DISPLAY
